

Stop Press! Correction!!

Dear Evelyn:

Sorry to be such a bother, but there is a misconstruction in my note on the prevalence of fertile coli which should be corrected, if convenient. On p. 2, line 7-8, "(the original source of K-12)" should be deleted, and "(also of human origin)" inserted after "the same facility as K-12". Any other construction with the same meaning will do if more convenient.

May I nominate Dr. Nangy K. Ziebur, Dept. Bacteriology, Oklahoma A&M, Stillwater, Okla., for the MGB mailing list? She is working on mutants and hopes for recombination in *Azotobacter agilis*.

Hurriedly,

Joshua Lederberg
